# Yasamine Cruz

Aurora, OR, 97002
(503) 413-9577
yasamine.97.cruz@gmail.com

---

**SKILLS**  React.js, JavaScript, jQuery, Python3, Redux, SQL, Git, HTML5, CSS3

## PROJECTS

### Down To Clown
Live Site | Github
*Down To Clown is a clone of meetup which allows people to connect through creating groups as well as events people can attend*

- The main features on this site include groups and events. Once you're logged in you can create a group that is unique to a user and their interests.
- After a user creates a group they may want to connect with other users that have joined it. That's where events come in; it allows you to host either in person or online events. Bringing people from all over the world together is this site's goal.
- Working with the javascript date object was an obstacle by itself and presented an interesting perspective on built in functions.

### Flare
Live Site | Github
*Flare is a clone of meetup that replicates its ability to give artists a platform for their photography.*

- A logged in user can navigate to their own page where they can view their photos and albums. This allows photographers to share their artform with other like minded people.
- If a user decides that a photo they've uploaded no longer represents them or that its name, description, or tags should be updated to fully encompass its uniqueness they may do so on the individual's photos page.
- Users can also create albums that can showcase specific photos that capture a certain time of year, feeling, or anything that a user wants to categorize.
- Users are given the ability to interact with each other's photography by commenting on a photo and adding their perspective of that photo.
- This site allows for multiple photos to be added to an album at the same time and that was fun and interesting to figure out.

### NatureNook
Live Site | Github
*This site is a clone of Hipcamp it aims to replicate Hipcamps features and uses Python3,*

*Javascript, React, Redux, SQLAlchemy, Html5, and CSS3.*

- This site was created with the goal of bringing people back to the outdoors and/or to get away from their day to day lives.
- It allows users to not only view a plethora of vacation spots but to create their own to share with others as well.
- It goes one step further by allowing users to review a spot in hopes that their review will be helpful to other people that are interested in it.
- A user is also able to view spots by multiple different categories including price, amenities, activities, type of residence, and location. This can help narrow down what a user views by their wants and needs.

**EXPERIENCE**
**Office Specialist II**
*Columbia River Correctional Institution, Jan* 2019 - Oct 2019
- Working with adults in custody is a very delicate matter and requires patience, people skills, and professionalism.
- Changing mental health code as well as scheduling providers requires technical know-how on an older computer system that the state of Oregon provides.
- Being on time and remembering the institution's rules and regulations is a must.

**Attendant**
Cracker Barrel, Feb 2016 - Oc 2019
- To create a welcoming environment personalizing with others is a must.
- Having a successful shift required teamwork. A willingness to work with others for the good of the company.
- Problem solving to the best of your ability was needed to handle stressful situations.

**EDUCATION**
**App Academy -** Immersive software development course with focus on full stack web development  (Spring 2017)
